

ETHAN SHAHROOZ MOGHADDAM

Data Scientist | Python Programmer

London, United Kingdom | 07519 109433 | shaz.moghaddam@gmail.com

[LinkedIn](#) | [GitHub](#) | [Website](#) | [Portfolio](#)

PROFILE

Data Science bootcamp graduate of Imperial College London (96% average), with hands-on experience in Python, data analysis, machine learning, and AI-assisted development workflows. Strong foundation in data cleaning, exploratory analysis, statistical reasoning, and predictive modelling using real-world datasets.

Over the past three years, I have independently designed, built, and commercialised digital productivity tools, distributing them across platforms including Gumroad, Lemon Squeezy, and Envato. This involves full product lifecycle management from concept and development to pricing strategy, customer support, and iterative improvement based on user feedback.

Following 14 years managing a household and raising a family, I bring strong organisation, discipline, and adaptability. I am now seeking a junior data scientist or Python-focused role where I can apply my technical skills in a professional environment and continue growing within the industry.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries:** pandas, NumPy, scikit-learn, Matplotlib, Seaborn
- **Tools:** Git, GitHub, Jupyter Notebook, Tableau, Excel
- **Machine Learning:** Regression, Classification, Feature Engineering, Model Evaluation
- **AI Tools:** Claude, ChatGPT, Gemini

EDUCATION

Imperial College London | March 2025 – September 2025

Python Programming for Data Science Bootcamp

- **Average Grade:** 96%
- Data types, statistics, machine learning, data cleaning, and visualisation

Udemy

The Complete Python Bootcamp: Zero to Hero | September 2023 – March 2024

Udemy

100 Days of Code – The Complete Python Pro Bootcamp | October 2022 – July 2023

PROJECTS

Crime Data Analysis & Classification

Python, pandas, NumPy, Matplotlib, Seaborn, scikit-learn

GitHub: github.com/ShazMoghaddam/Crime-Data-Analysis-Project

- Delivered an end-to-end data science project analysing real-world crime data from 2020 to present.
- Cleaned and preprocessed large, messy CSV datasets, handling missing values, duplicates, and categorical features.
- Engineered time-based features from date fields to support temporal analysis.
- Conducted exploratory data analysis to identify trends across years, weekdays, and crime categories.
- Built a Random Forest classification model to predict crime type using temporal features.
- Evaluated performance using accuracy, precision, recall, and confusion matrices, prioritising interpretability.
- Clearly documented assumptions, limitations, and insights for non-technical audiences.

Stock Tracker Dashboard & Technical Analysis

Python, pandas, yfinance, Matplotlib, Jupyter Notebook

GitHub: github.com/ShazMoghaddam/Stock_Tracker_Dashboard

- Developed a Python-based stock tracking dashboard analysing historical price data for AAPL, AMZN, GOOGL, and JPM.
- Retrieved financial time-series data using the Yahoo Finance API.
- Cleaned and structured data to support analysis and visualisation.

- Implemented a Simple Moving Average (SMA) crossover strategy to demonstrate buy/sell signals.
- Created clear, interpretable visualisations and documented the full workflow in a Jupyter Notebook.

CVLens – AI CV Reader & Analyzer

Python, spaCy, NLP, pdfplumber, python-docx

GitHub: github.com/ShazMoghaddam/CVLens

- Built an NLP-driven system to parse and analyse CVs in PDF and DOCX formats using Python.
- Applied spaCy for tokenisation, entity processing, and skill extraction from unstructured text.
- Developed rule-based and pattern-matching methods to detect and classify CV sections.
- Implemented skill extraction and normalisation pipelines to improve consistency across resumes.
- Designed automated CV quality checks to identify missing sections and structural weaknesses.
- Generated structured, human-readable feedback based on NLP analysis results.

Lending Club Loan Analysis & Default Prediction

Python, pandas, NumPy, Matplotlib, Seaborn, scikit-learn

GitHub: github.com/ShazMoghaddam/Lending_Club_Loan_Project

- Analysed historical Lending Club loan data to identify key factors associated with loan default risk.
- Cleaned and preprocessed a large real-world financial dataset using pandas and NumPy.
- Conducted exploratory data analysis and visualised patterns in borrower income, interest rates, and debt-to-income ratios.
- Built and evaluated a Logistic Regression model to predict loan default, addressing class imbalance using stratified sampling and balanced class weights.
- Documented methodology, findings, and limitations in a structured Jupyter Notebook and published the project on GitHub.

CORE COMPETENCIES

Analytical Thinking | Collaboration | Problem-solving | Self-Directed Learning | Time Management | Communication

EMPLOYMENT HISTORY

Digital Product Developer (Self-Employed, Remote) 2023 – Present

Online Shop: shazmogh.gumroad.com

- Designed and launched Aero AtlasTerminal – Time Screensaver and TradeHourPro – Live Global Market Hours.
- Managed end-to-end product lifecycle including development, pricing, publishing, platform optimisation, and customer engagement.
- Distributed products through Gumroad, Lemon Squeezy, and Envato.
- Applied data-driven iteration and user feedback analysis to refine features and improve usability.
- Generated recurring side income while balancing technical study and family responsibilities.

Sales Representative (Technology) – John Lewis / Currys (Agency), London March 2011 – March 2013

- Customer engagement, technical product advice, and sales support.
- Worked across multiple sites, developing strong problem-solving and prioritisation skills.
