

# ETHAN SHAHROOZ MOGHADDAM

*Data Scientist · Python Developer · Android App Developer · Digital Product Creator*

Available for: Full-time · Freelance / Contract · Remote · Hybrid · Open to international opportunities  
London, UK · 07519 109433 · shaz.moghaddam@gmail.com · [LinkedIn](#) · [GitHub](#) · [Website / Portfolio](#)

## PROFILE

Imperial College London graduate in Data Science (96% average) and Python developer, with a strong portfolio spanning data analysis, machine learning, NLP, and end-to-end product development. Comfortable working independently across the full project lifecycle — from raw data and model building through to deployment, documentation, and iteration.

Alongside technical study, I independently design, build, and commercialise Android apps and digital tools, distributing products across the Google Play Store, Gumroad, Lemon Squeezy, and Envato. Six published Android apps and a growing catalogue of finance and productivity tools sharpen real commercial instincts in parallel with technical skills — pricing strategy, user feedback loops, iterative improvement, and product positioning are as much a part of my toolkit as the code itself.

After a period dedicated to full-time family commitments, I returned to tech with focus and intent — building a portfolio of real-world ML projects, shipping commercial apps and digital products to market, and continuing to grow my skills with every build. I am actively seeking a junior data scientist or Python developer role where I can make a meaningful contribution and continue growing within a collaborative team.

## TECHNICAL SKILLS

**Languages:** Python, SQL, JavaScript, Java, HTML, CSS

**Libraries:** pandas, NumPy, scikit-learn, Matplotlib, Seaborn, yfinance, spaCy, pdfplumber, python-docx

**Tools & Frameworks:** Git, GitHub, Jupyter Notebook, Streamlit, Flask, Tableau, Power BI, Excel

**Machine Learning:** Regression, Classification, Feature Engineering, Model Evaluation, NLP

**Development:** Android (Google Play Store), Web Applications, UI / Visual Design

**AI Tools:** Claude, ChatGPT, Gemini integrated into development and product workflows

**Product Platforms:** Google Play Store, Gumroad, Lemon Squeezy, Envato

## SELECTED PROJECTS

### Crime Data Analysis & Classification

*Python · pandas · NumPy · Matplotlib · Seaborn · scikit-learn*

- End-to-end analysis of real-world crime data (2020 to present), covering cleaning, feature engineering, and exploratory analysis
- Built a Random Forest classifier to predict crime type from temporal features; evaluated with accuracy, precision, recall, and confusion matrices
- Documented assumptions, limitations, and insights clearly for both technical and non-technical audiences

GitHub: [github.com/ShazMoghaddam/Crime-Data-Analysis-Project](https://github.com/ShazMoghaddam/Crime-Data-Analysis-Project)

### CVLens – AI CV Reader & Analyser

*Python · spaCy · NLP · pdfplumber · python-docx*

- NLP-driven tool to parse CVs in PDF and DOCX formats; extracts skills, detects section structure, and flags weaknesses
- Applies tokenisation, entity recognition, rule-based matching, and normalisation pipelines for consistent output
- Generates structured, human-readable feedback from unstructured text — a practical application of NLP in a real hiring context

GitHub: [github.com/ShazMoghaddam/CVLens](https://github.com/ShazMoghaddam/CVLens)

### Lending Club Loan Default Prediction

*Python · pandas · NumPy · Matplotlib · Seaborn · scikit-learn*

- Analysed historical loan data to identify key default risk factors across income, interest rates, and debt-to-income ratios
- Built a Logistic Regression model addressing class imbalance with stratified sampling; documented methodology and findings in a structured Jupyter Notebook

GitHub: [github.com/ShazMoghaddam/Lending\\_Club\\_Loan\\_Project](https://github.com/ShazMoghaddam/Lending_Club_Loan_Project)

### Stock Tracker Dashboard & Technical Analysis

*Python · Streamlit · pandas · yfinance · Plotly · Jupyter Notebook*

- Built an interactive Python stock dashboard analysing AAPL, AMZN, GOOGL, and JPM using the Yahoo Finance API and Streamlit
- Implemented an SMA crossover strategy to generate buy/sell signals; visualised and documented the full workflow

GitHub: [github.com/ShazMoghaddam/Stock\\_Tracker\\_Dashboard](https://github.com/ShazMoghaddam/Stock_Tracker_Dashboard)

### FAO & FDI Data Analysis

*Python · pandas · NumPy · Matplotlib · Seaborn · Open Data · Jupyter*

- Analysed global agricultural and foreign direct investment trends using open datasets from the FAO and World Bank
- Performed data cleaning, exploratory analysis, and visual storytelling to uncover patterns in international development data

GitHub: [github.com/ShazMoghaddam/FAO-FDI-Analysis-World-Bank-Open-Data](https://github.com/ShazMoghaddam/FAO-FDI-Analysis-World-Bank-Open-Data)

## ANDROID APPS — GOOGLE PLAY STORE

Six published apps across educational, utility, and creative categories, all free to download:

- **Math Adventure – Maths for Kids** — Adventure-based learning app for ages 3–11, combining storytelling and exploration with maths challenges. [Play Store](#)
- **Bingo Maths** — Bingo-style maths game for Android; makes practising arithmetic engaging through familiar mechanics. [Play Store](#)
- **Split Flap World Clock** — Living departure board app inspired by iconic Solari split-flap displays; supports 300+ cities and multiple colour themes. [Play Store](#)
- **Animated Month Wallpaper** — Minimal animated live wallpaper displaying the current month with 7 language options, 5 fonts, and a live clock. [Play Store](#)
- **Animated Weekday Wallpaper** — Minimal animated live wallpaper displaying the current day of the week with multi-language and font options. [Play Store](#)
- **World Builders** — Upcoming app currently in review on the Google Play Store.

## DIGITAL PRODUCTS

Finance tools, productivity utilities, and screensavers distributed across Gumroad, Lemon Squeezy, and Envato.

Android apps available on the Google Play Store:

- **Market Pulse** — Minimal self-hosted economic calendar for traders — high-impact events, LIVE detection, local timezone conversion, zero dependencies. Single HTML file, works fully offline.
- **TradeHours Pro** — Live global market hours tracker for 25+ markets, real-time open/close countdowns, holiday calendar, installable as a home screen app, works offline.
- **Aero Atlas – Terminal Time Screensaver** — Fullscreen split-flap Solari-inspired screensaver displaying live world clocks for up to 10 cities; 5 colour themes, acoustic click sounds, works offline on macOS and Windows.
- **Animated Live Wallpapers – Months & Weekdays** — Minimal animated wallpapers in HTML/CSS with 7 languages, 5 fonts, and live clock. Compatible with Lively Wallpaper and Plash, fully offline.

## EXPERIENCE

**Independent Digital Product Developer · Remote** 2022 – Present

[shazmoghaddam.github.io](#) · [Google Play Store](#) · [Gumroad](#) · [Lemon Squeezy](#) · [Envato](#)

- Independently design, develop, and commercialise six Android apps and a catalogue of digital tools, managing the full product lifecycle from concept and build through to publishing, pricing, and customer support
- Published Android apps span educational maths games (Math Adventure, Bingo Maths), live wallpapers (Animated Month & Weekday Wallpaper), and a world clock app (Split Flap World Clock), all available free on Google Play
- Digital product catalogue spans finance tools (Market Pulse, TradeHours Pro), screensavers (Aero Atlas), and animated wallpapers across web and Android ecosystems
- Apply user feedback and data-driven iteration to refine features, improve usability, and grow revenue streams across platforms

**Sales Representative (Technology) · John Lewis / Currys (Agency), London** March 2011 – March 2013

- Customer engagement, technical product advice, and sales support across multiple London sites
- Developed strong communication, prioritisation, and stakeholder management skills in a fast-paced retail environment

## EDUCATION & CERTIFICATIONS

**Imperial College London** March 2025 – September 2025

*Python Programming for Data Science Bootcamp* · Average Grade: 96%

- Data types, statistics, machine learning, data cleaning, and visualisation

**Google Play Academy** April 2026

*Google Play Store Listing Certificate* · Valid through April 2029 · No: 179779870

**Udemy** October 2025

*The Data Science Course: Complete Data Science Bootcamp 2025* · 32 hours

**Udemy** January 2024

*iOS & Swift: The Complete iOS App Development Bootcamp* · 60.5 hours

**Udemy** October 2022 – July 2023

*100 Days of Code: The Complete Python Pro Bootcamp* · *The Complete Python Bootcamp: Zero to Hero* · 58 hours
