

Shaz (Ethan Shahrooz) Moghaddam

Data Scientist · Python Developer

London, UK · 07519 109433 · shaz.moghaddam@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Right to Work: British citizen · DBS Check: Available on request

PROFILE

Imperial College London-trained Data Scientist (96% average) and Python developer with a strong portfolio spanning ML, NLP, causal AI, and production-grade full-stack development. Most recently built VoltEdge, an enterprise energy intelligence platform with real-time multi-site monitoring, anomaly detection, CSRD-ready ESG reporting, and a Claude-powered AI assistant — deployed to production with 903 passing tests. Seven shipped Android and Flutter apps on the Google Play Store add commercial product experience and user-focused iteration alongside technical delivery.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Dart (Flutter), Kotlin & Java, HTML, CSS

Libraries: pandas, NumPy, scikit-learn, spaCy, Matplotlib, Seaborn, SciPy, Plotly, FastAPI, TensorFlow, NetworkX

Frameworks & Tools: Plotly Dash, React, Flask, Streamlit, Electron, Node.js, Firebase, Docker, Git, Jupyter, REST APIs, Power BI, Tableau

Cloud & Deploy: AWS (ECS Fargate), GCP (Cloud Run), Render, Railway, Docker (multi-stage)

Machine Learning: Regression, Classification, Anomaly Detection (Isolation Forest), Causal AI (PC Algorithm), NLP, Random Forest, Gradient Boosting

AI Integration: Anthropic Claude API, ChatGPT, Gemini — integrated into products and development workflows

Mobile: Android (Kotlin & Java), Flutter (Dart), Google Play Store

SELECTED PROJECTS

VoltEdge — Enterprise Energy Intelligence Platform

FastAPI · Plotly Dash · scikit-learn · Causal AI · SQLite · Docker · Claude AI · Render

- Real-time multi-site energy monitoring with 90 days of seeded demo data across 4 industrial sites; ML anomaly detection (Isolation Forest) trained per-site, with causal AI root-cause analysis (PC algorithm, NetworkX) and quantified causal strength scores.
- CSRD-ready ESG reporting covering Scope 2 emissions, GRI 302-1, and carbon intensity; plain-English AI assistant powered by Claude for natural-language querying of site data.
- JWT authentication with RBAC, SOC 2 audit trail, 903 passing tests; deployed to Render via Docker.

ClinIQ — Clinical Trial Site Performance Intelligence

FastAPI · Plotly Dash · SQLAlchemy · scikit-learn · spaCy · Claude AI · Docker

- B2B intelligence platform for monitoring clinical trial site performance across mid-market CROs in the UK and EU — tracks enrolment velocity, risk scoring, and deviation patterns across sites in real time.
- NLP-driven deviation analysis using spaCy; ML risk scoring with scikit-learn; plain-English AI assistant powered by Claude for natural-language querying of trial data.
- Full-stack production build with FastAPI backend, Plotly Dash frontend, SQLAlchemy ORM, and Docker deployment.

SalaryAxis — UK Salary Intelligence Platform

Python · Flask · React · pandas · NumPy · SciPy · Docker · AWS / GCP · ONS Open Data

- Production-grade salary benchmarking platform built on ONS ASHE open data, with CPI inflation adjustment, regional breakdowns, gender pay gap trends, occupation distribution profiles, and CAGR analysis.
- REST API with React dashboard; deployable to AWS ECS Fargate or GCP Cloud Run via multi-stage Docker. GDPR-compliant, no personal data collected.

GitHub: github.com/ShazMoghaddam/salaryaxis

CVLens — AI CV Reader & Analyser

Python · spaCy · NLP · pdfplumber · python-docx

- NLP-driven tool to parse CVs in PDF and DOCX formats; extracts skills, detects section structure, and flags weaknesses using tokenisation, entity recognition, and rule-based matching pipelines.

GitHub: github.com/ShazMoghaddam/CVLens

World Map — Interactive Choropleth Explorer

HTML5 · CSS · Vanilla JS · SVG

- Interactive choropleth map covering 172 countries across 7 data layers (GDP per Capita, HDI, CO₂, Life Expectancy, and more); region/political group filtering, custom data import, shareable URLs, iframe embedding with a full JS API. Single HTML file, zero dependencies, MIT licensed.

EXPERIENCE

Independent Product & Software Developer^{2022 – Present}

Remote · shazmoghaddam.github.io · Google Play Store · Gumroad / Lemon Squeezy / Envato

- Built and shipped seven Android and Flutter apps to the Google Play Store, managing the full product lifecycle from concept to release and iteration.

- Digital product catalogue across Gumroad, Lemon Squeezy, and Envato — finance tools (Market Pulse, TradeHours Pro), generative art systems (Typography Digits, KNOK Matrix), and screensavers (Aero Atlas). Iterated on features based on user feedback across multiple platforms.

Sales Representative (Technology) Mar 2011 – Mar 2013

John Lewis / Currys (Agency) · London

- Customer engagement and technical product advice across multiple London sites; developed communication, prioritisation, and stakeholder management skills.

EDUCATION & CERTIFICATIONS

Data Science Bootcamp — Imperial College London / HyperionDev

June 2025 · Average Grade: 96%

Machine learning, NLP, statistical analysis, data cleaning, and visualisation.

Google Play Store Listing Certificate — Google Play Academy

April 2026 · Valid through April 2029

The Data Science Course: Complete Data Science Bootcamp — Udemy

October 2025 · 32 hours

iOS & Swift: The Complete iOS App Development Bootcamp — Udemy

January 2024 · 60.5 hours

100 Days of Code & The Complete Python Bootcamp — Udemy

Oct 2022 – Jul 2023 · 58 hours

ADDITIONAL

Writing: Six personal essays published on Medium on growth, identity, technology, and perspective. medium.com/@shaz.moghaddam

Available for: Full-time · Freelance / Contract · Remote · Hybrid · Open to international opportunities
