

ETHAN SHAHROOZ MOGHADDAM

Data Scientist · Python Developer · Android & Flutter App Developer · Digital Product Creator

Available for: Full-time · Freelance / Contract · Remote · Hybrid · Open to international opportunities

London, UK · 07519 109433 · shaz.moghaddam@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Profile

Imperial College London graduate in Data Science (96% average) and Python developer, with a strong portfolio spanning data analysis, machine learning, NLP, and production-grade full-stack development. Comfortable working independently across the full project lifecycle — from raw data and model building through to deployment, documentation, and iteration.

Alongside technical study, I independently design, build, and commercialise Android and Flutter apps and digital tools, distributing products across the Google Play Store, Gumroad, Lemon Squeezy, and Envato. Seven published apps — including SearchWars (Flutter), Split Flap World Clock, and the Math Adventure suite — and a growing catalogue of finance and productivity tools. Most recently built SalaryAxis, a production-grade UK salary intelligence platform using Python, Flask, React, Docker, and AWS/GCP. These projects sharpen real commercial instincts: pricing strategy, user feedback loops, iterative improvement, and product positioning are as much part of my toolkit as the code itself.

After a period dedicated to full-time family commitments, I returned to tech with focus and intent — building a portfolio of real-world ML and full-stack projects, shipping commercial apps and digital products to market, and continuing to grow my skills with every build. I am actively seeking a junior data scientist or Python developer role where I can make a meaningful contribution and continue growing within a collaborative team.

Technical Skills

Languages: Python, SQL, JavaScript, Kotlin & Java, HTML, CSS

Libraries: pandas, NumPy, scikit-learn, spaCy, Matplotlib, Seaborn, SciPy, Plotly, yfinance, pdfplumber, python-docx, TensorFlow

Frameworks & Tools: React, Flask, Streamlit, Node.js, Firebase, Docker, Git, GitHub, Jupyter Notebook, REST APIs, Tableau, Power BI, Excel

Cloud & Deployment: AWS (ECS Fargate), GCP (Cloud Run), Docker (multi-stage builds)

Machine Learning: Regression, Classification, Feature Engineering, Model Evaluation, NLP, Random Forest, Logistic Regression

Mobile Development: Android (Kotlin & Java, Google Play Store), Flutter (Dart)

AI Tools: Claude, ChatGPT, Gemini — integrated into development and product workflows

Product Platforms: Google Play Store, Gumroad, Lemon Squeezy, Envato

Selected Projects

SalaryAxis — UK Salary Intelligence Platform

Python · Flask · React · pandas · NumPy · SciPy · Docker · AWS / GCP · ONS Open Data

- Production-grade UK salary intelligence platform built on ONS Annual Survey of Hours and Earnings open data, with CPI inflation adjustment, statistical analysis, and regional benchmarking
- Delivers fair salary benchmarks via a REST API and React dashboard, with regional breakdowns, gender pay gap trends, occupation distribution profiles, and CAGR analysis — GDPR-compliant, no personal data collected
- Deployable to AWS ECS Fargate or GCP Cloud Run via multi-stage Docker; full CI/CD pipeline

GitHub: <https://github.com/ShazMoghaddam/salaryaxis>

Crime Data Analysis & Classification

Python · pandas · NumPy · Matplotlib · Seaborn · scikit-learn

- End-to-end analysis of real-world crime data (2020 to present), covering cleaning, feature engineering, and exploratory analysis
- Built a Random Forest classifier to predict crime type from temporal features; evaluated with accuracy, precision, recall, and confusion matrices
- Documented assumptions, limitations, and insights clearly for both technical and non-technical audiences

GitHub: <https://github.com/ShazMoghaddam/Crime-Data-Analysis-Project>

CVLens — AI CV Reader & Analyser

Python · spaCy · NLP · pdfplumber · python-docx

- NLP-driven tool to parse CVs in PDF and DOCX formats; extracts skills, detects section structure, and flags weaknesses
- Applies tokenisation, entity recognition, rule-based matching, and normalisation pipelines for consistent output
- Generates structured, human-readable feedback from unstructured text — a practical application of NLP in a real hiring context

GitHub: <https://github.com/ShazMoghaddam/CVLens>

Lending Club Loan Default Prediction

Python · pandas · NumPy · Matplotlib · Seaborn · scikit-learn

- Analysed historical loan data to identify key default risk factors across income, interest rates, and debt-to-income ratios
- Built a Logistic Regression model addressing class imbalance with stratified sampling; documented methodology and findings in a structured Jupyter Notebook

GitHub: https://github.com/ShazMoghaddam/Lending_Club_Loan_Project

Stock Tracker Dashboard & Technical Analysis

Python · Streamlit · pandas · yfinance · Plotly · Jupyter Notebook

- Built an interactive Python stock dashboard analysing AAPL, AMZN, GOOGL, and JPM using the Yahoo Finance API and Streamlit
- Implemented an SMA crossover strategy to generate buy/sell signals; visualised and documented the full workflow

GitHub: https://github.com/ShazMoghaddam/Stock_Tracker_Dashboard

Android & Flutter Apps — Google Play Store

Seven published apps across educational, utility, and creative categories, all free to download:

- **SearchWars — Which Gets More Google Searches?** — Higher/lower guessing game built with Flutter. Players guess which of two items gets more monthly Google searches across 3,187 questions in 11 categories (Sports, Celebrity, Tech, Gaming, Geography, and more). Features 3 lives, per-category high scores, and smooth card animations.

Play Store: <https://play.google.com/store/apps/details?id=com.searchwars.app>

- **Math Adventure – Maths for Kids** — Adventure-based learning app for ages 3–11, combining storytelling and exploration with maths challenges.

Play Store: <https://play.google.com/store/apps/details?id=com.shazmoghaddam.mathadventure>

- **Bingo Maths** — Bingo-style maths game for Android; makes practising arithmetic engaging through familiar mechanics.

Play Store: <https://play.google.com/store/apps/details?id=com.ShazMoghaddam.bingomaths>

- **Split Flap World Clock** — Living departure board app inspired by iconic Solari split-flap displays; supports 300+ cities and multiple colour themes.

Play Store: <https://play.google.com/store/apps/details?id=com.ShazMoghaddam.splitflapworldclock>

- **Animated Month Wallpaper** — Minimal animated live wallpaper displaying the current month with 7 language options, 5 fonts, and a live clock.

Play Store: <https://play.google.com/store/apps/details?id=com.ShazMoghaddam.animatedmonthwallpaper>

- **Animated Weekday Wallpaper** — Minimal animated live wallpaper displaying the current day of the week with multi-language and font options.

Play Store: <https://play.google.com/store/apps/details?id=com.ShazMoghaddam.animatedweeklywallpaper>

- **World Builders** — Upcoming app currently in review on the Google Play Store.

Digital Products

Finance tools, productivity utilities, and screensavers distributed across Gumroad, Lemon Squeezy, and Envato:

- **Market Pulse** — Minimal self-hosted economic calendar for traders — high-impact events, LIVE detection, local timezone conversion, zero dependencies. Single HTML file, works fully offline.
- **TradeHours Pro** — Live global market hours tracker for 25+ markets, real-time open/close countdowns, holiday calendar, installable as a home screen app, works offline.
- **Aero Atlas – Terminal Time Screensaver** — Fullscreen split-flap Solari-inspired screensaver displaying live world clocks for up to 10 cities; 5 colour themes, acoustic click sounds, works offline on macOS and Windows.
- **Animated Live Wallpapers – Months & Weekdays** — Minimal animated wallpapers in HTML/CSS with 7 languages, 5 fonts, and live clock. Compatible with Lively Wallpaper and Plash, fully offline.

Experience

Independent Digital Product Developer · Remote 2022 – Present

shazmoghaddam.github.io · Google Play Store · Gumroad · Lemon Squeezy · Envato

- Independently design, develop, and commercialise seven Android and Flutter apps and a catalogue of digital tools, managing the full product lifecycle from concept and build through to publishing, pricing, and customer support
- Built **SalaryAxis**, a production-grade UK salary intelligence platform using Python, Flask, React, Docker, and AWS/GCP — demonstrating full-stack capability from data pipeline through to deployed REST API and React dashboard
- Published Android apps include **SearchWars** (Flutter, higher/lower Google search game with 3,187 questions across 11 categories), **Math Adventure** and **Bingo Maths** (educational maths games), **Split Flap World Clock** (300+ world cities, Solari-inspired flip display), and **Animated Month & Weekday Wallpapers** (live animated wallpapers with multi-language support)

- Digital product catalogue spans finance tools (**Market Pulse**, **TradeHours Pro**), screensavers (**Aero Atlas**), and animated wallpapers across web and Android ecosystems
- Apply user feedback and data-driven iteration to refine features, improve usability, and grow revenue streams across platforms

Sales Representative (Technology) · **John Lewis / Currys (Agency), London** *March 2011 – March 2013*

- Customer engagement, technical product advice, and sales support across multiple London sites
- Developed strong communication, prioritisation, and stakeholder management skills in a fast-paced retail environment

Education & Certifications

Imperial College London · **HyperionDev** *June 2025*

Data Science Online Bootcamp · Average Grade: 96% · Certificate No: ES25030017561-7076

- Data types, statistics, machine learning, data cleaning, and visualisation

Google Play Academy *April 2026*

Google Play Store Listing Certificate · Valid through April 2029 · No: 179779870

Udemy *October 2025*

The Data Science Course: Complete Data Science Bootcamp 2025 · 32 hours

Udemy *January 2024*

iOS & Swift: The Complete iOS App Development Bootcamp · 60.5 hours

Udemy *October 2022 – July 2023*

100 Days of Code: The Complete Python Pro Bootcamp · The Complete Python Bootcamp: Zero to Hero · 58 hours
